1962

Launch of the Sink Dish Washer – a sink with integrated dishwasher.

1981

BLANCO is the first company in the sector to market composite sinks worldwide, made of Silacron.

1985

Launch of the BLANCOMULTI BOX, the first waste solution directly connected to the sink.

1995

The second worldwide Silgranit manufacturing facility is established in North America.

2011

Introduction of the award-winning BLANCOCULINA semi-pro faucet.

2016

BLANCO launches the revolutionary IKON apron - the world‘s first single construction granite composite farmhouse sink.

2022

Color match UNITs with coordinating faucets, sinks and accessories are released in combination with BOTTON II, BLANCO‘s first cabinet organization solution.

2025

Launch of the INTEOS workstation family, with one-of-a-kind Stack & Store accessory organization system.

INTEOS 45 is the largest granite composite workstation available on the market.

How can the kitchen sink be transformed into the perfect kitchen water place?
With **100 YEARS OF EXPERIENCE**, tireless love of innovation and an unparalleled commitment to quality.
In short, with unique expertise in all areas.

WATER IS LIFE.
PERFECT WATER IS QUALITY OF LIFE.

Our water filters and filter-ready faucets transform tap water into pure enjoyment – fresh from the tap, and available at any time.

FILTER-READY FAUCETS

Add cold, filtered water right at the kitchen sink with our range of filter-ready faucets. Consider our two-in-one CATRIS Flexo Filter designed with a separate filtered water spout and dial.

Prefer a separate beverage faucet? Both BLANCOCULINA II and ALTA II collections offer beverage faucet options that coordinate with the main kitchen faucet.

FILTRATION OPTIONS

Filtered water right where you need it most. BLANCO filters perfectly pair with our filter-ready faucets and sit below the sink and out of sight.

Delivering fresh, better tasting water while removing over 50 contaminants and unwanted particles, both filter options provide safe, clean water. The Soft L softens and filters, while the Microplastic S filters and removes microplastic particles.

WATER IN ALL ITS GLORY.
OPTIONS FOR EVERY TASTE.

Water saving:
All BLANCO faucets are available with a 1.5 GPM flow rate, providing water-saving benefits while still delivering strong water performance.

Best in-class:
BLANCO faucets are made of solid brass construction, with pressure resistant ceramic cartridges that are smooth in operation.

Conveniently clean:
Many faucets include patented silicone nozzles – simply rub the sprayhead with your fingertip to prevent buildup from limescale deposits.

Easy to install:
All faucets are equipped with color-coded hot and cold supply lines. New BLANCOLock system is available on ALTA II and BLANCOCULINA II, providing greater faucet stability and quicker installation.

INNOVATIVE IDEAS.

1
TWO SENSORS - DOUBLE THE EASE:
With the BLANCOCULINA II and Mini Sensor faucets, experience a touchless faucet with dual-sensor technology.

HAND WASHING SENSOR
Wave goodbye to messy fingerprints on the faucet thanks to the infrared motion sensor. A simple wave turns the faucet on and off, and it automatically shuts off in 90 sec.

POT FILLING SENSOR
The intuitive controls extend to filling pots with a sensor underneath the semi-pro‘s arm. The sensor activates when it detects an object and water starts to flow. As soon as the pot or vase is removed from the sensor area, the valves close.

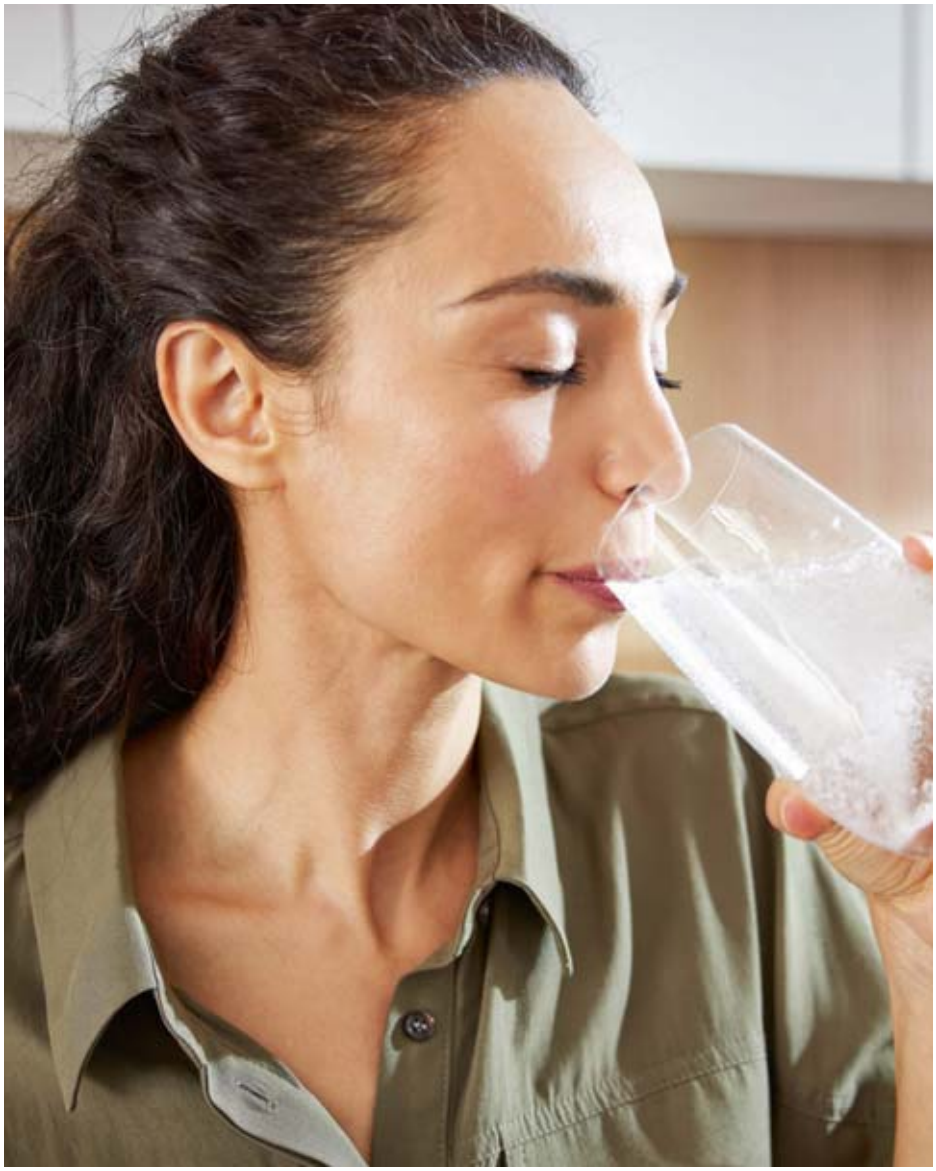

2
DIALED INTO DETAILS:
Designed with separate water spouts, the CATRIS Flexo Filter faucet ensures no cross-contamination between filtered and tap water. Use the left dial to access filtered drinking water.

DIFFERENT STREAMS

At BLANCO, we do the water stream differently. Which one is better? Both offer unique benefits in the kitchen.

Clear laminar stream
Crystal clear and quiet: this stream type has a natural look and gentle force while still providing ample water pressure. Enjoy less water splashes, and less wiping around your sink.

Aerated stream
Dynamic and efficient: the aerated stream infuses air bubbles into the water resulting in a frothy appearance and provides a powerful, yet soft rinsing action

TIDINESS IS HALF THE BATTLE IN THE KITCHEN.

With a variety of **MODULAR** organization and waste systems, turn the chaos into calm. There are endless benefits to a tidy countertop and staying organized below the sink.

EVERYTHING IN ONE PLACE. The cabinet under the sink is one of the most frequently opened cabinets in the kitchen. But it is commonly overlooked. With a BLANCO UNIT, the sink cabinet plays an important role. Our base cabinet organization products are modular in design and offer simple storage solutions to often complex sink cabinet problems.

Storage on-the-go.
Keep cleaning supplies and kitchen items organized and within reach with a Storage Caddy. Select a single or double caddy that extends out and can easily be transported to other rooms, making everyday clean-up a breeze.

The BOTTON II is another portable option with two bins, great for sorting recyclables and cleaning products. By remaining organized below the sink, the tidying routine is simplified in the kitchen and throughout the home.

Conquer the clutter
Hoping to free up countertop space and store larger items out of sight? The Universal Bag XL works wonders for storing everyday tools or dry recycling material. The portable bag can be removed and placed back on the sliding base tray for convenient access.

For those who love meal prep and workstation sink accessories, but don't know where to store them – INTEOS Organizer XL 40 is the answer. Designed for quick access of INTEOS workstation sink accessories, the built-in partitions hold everything in place when not in use.

SINK AND FAUCET CARE

How to Clean SILGRANIT

Daily cleaning: to clean marks and everyday traces of use from your sink, all you need is a sponge, mild dish soap or baking soda and water:
— Moisten the sponge under running water
— Add a small amount of dish soap or baking soda onto the soft side of the sponge
— With the soft side of the sponge, wipe in small, circular movements
— Rinse your sink with clean water and dry it with a microfiber cloth

Weekly cleaning: Limescale is a common challenge for Silgranit sinks. Did you know that most stains and discoloration on a sink are a result of food particles trapped in limescale deposits on the surface? When you remove limescale, you also remove stubborn stains. We recommend removing limescale before starting any deep cleaning process. BLANCOCLEAN Daily+ for Silgranit or any mild acid-based cleaners (like lemon or vinegar) will remove limescale.
— Pour BLANCOCLEAN Daily+ on the sink area to be cleaned
— Leave for 1-2 minutes to take effect
— Wipe with a wet cloth or soft sponge
— Rinse the surface with water and dry with a microfiber cloth

Deep cleaning: once or twice a year we recommend to deep clean your sink with a mild liquid/gel laundry detergent:
— Close the sink drain
— Distribute the liquid/gel laundry detergent evenly onto the sink surface
— Fill the sink with hot water (heated up to 60°C / 140°F)
— Leave it to work at least 2 hours or ideally overnight
— Drain the solution and rinse the sink thoroughly with water
— Dry with a microfiber cloth

SINK AND FAUCET CARE

How to Clean Stainless Steel

Daily cleaning: stainless steel surfaces are best cleaned immediately after use. This helps prevent limescale. The process is quite simple:
— Squeeze some dish soap onto the soft side of a sponge
— Wipe the stainless steel surface in the direction of brushed finish
— Rinse with clean water and dry with a microfiber cloth

Weekly cleaning: BLANCOCLEAN Daily+ for stainless steel is a gentle formula that provides extra care to reduce limescale and soap scum buildup. Regular use is recommended to extend the life of your BLANCO sink.
— Pour BLANCOCLEAN Daily+ directly onto the sink
— Let sit for 1-2 minutes to take effect
— Wearing a glove wipe with a wet cloth or soft sponge
— Rinse the surface thoroughly and dry with a microfiber cloth

Avoid these cleaning mistakes:
— Do not use aggressive cleaning agents, abrasive cleaners or bleach containing hypochlorite
— Do not use cleaning baths for silver
— Do not use prickly brushes or the scratchy side of sponges (especially pot scouring pads)
— Never use steel wool for cleaning

Aggressive cleaners and brushes can cause scratches and permanently damage the surface of your stainless steel sink. Learn more cleaning tips for stainless steel by visiting our website: blanco.com/sscare

How to Clean Faucets

Daily maintenance: When turning off your faucet with wet hands, you almost always leave drops of water on it. These dry and leave limescale behind. Visible limescale can form quickly, particularly in regions that have hard water. If you have hard water, you should dry the surface of your faucet with a microfiber cloth after each use. This will allow you to extend the intervals between regular cleanings.

Regular cleaning: If limescale has formed on your faucet, treat this with a mild, organic acid, e.g., lemon or vinegar. Important: before applying the substance, check whether your surfaces are resistant to acids. To remove limescale:
— Apply the cleaning agent to the soft side of a sponge and wipe the faucet down thoroughly
— Be sure not to leave acid-based cleaner on for longer than indicated on the package instructions
— Avoid lengthy, vigorous scrubbing with the rough side of a sponge, this can leave scratches
— Rinse the faucet with clean water and dry with a microfiber cloth
