# 1/2" GENERAL GUIDELINES FOR PLANNING AND LAYOUT

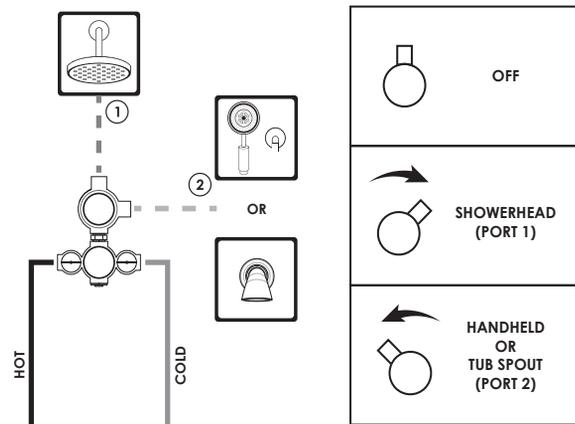

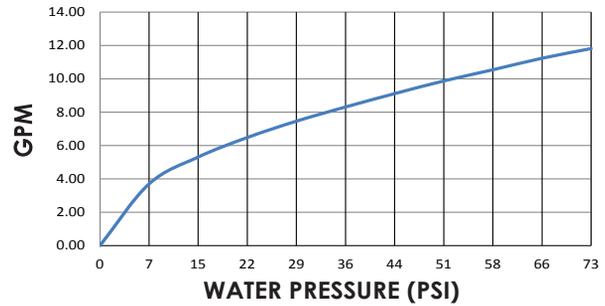

1/2" thermostatic valve will provide automatic temperature control and adequate water flow to operate multiple devices. The temperature control feature is independent of the integrated transfer valve.

The sum total of water consumption of the combined shower outlets must not exceed the rated gallons per minute (gpm) of the thermostatic valve (see flow charts below, as measured from the top outlet, mixed hot & cold).

## 3/4" GENERAL GUIDELINES FOR PLANNING AND LAYOUT

- 1) **Valve**—3/4" thermostatic valve. This valve will provide automatic temperature control and adequate water flow to operate multiple devices. The temperature control feature is not only a convenience but a safety consideration as well.
- 2) **Shower Outlets**—The sum total of water consumption of the combined shower outlets *must not exceed* the rated gallons per minute (gpm) of the thermostatic valve (see flow chart below).

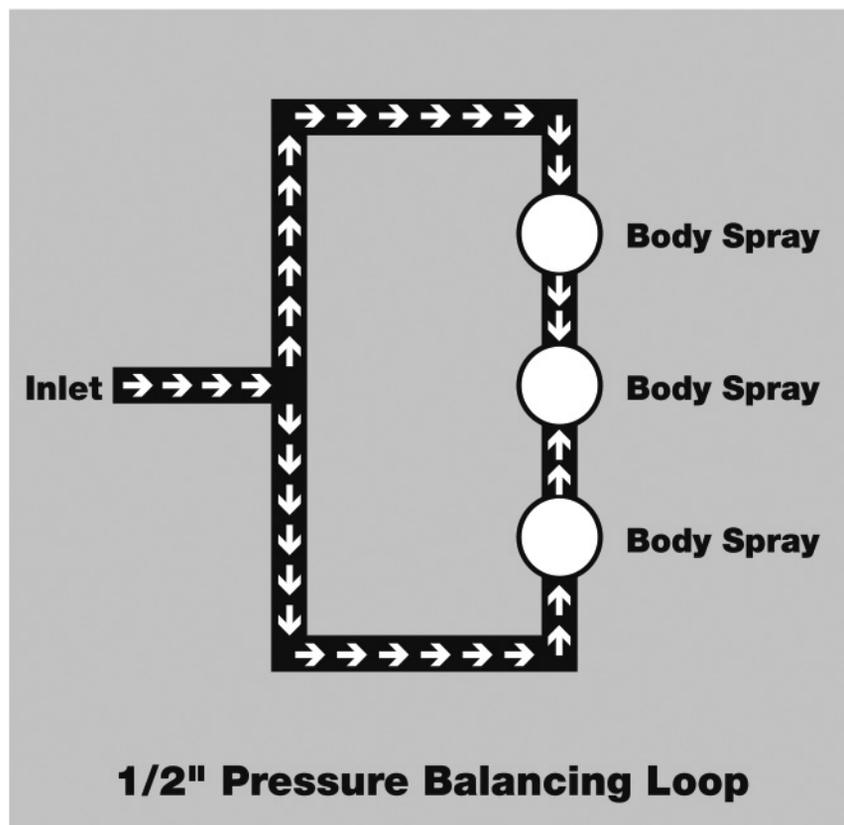

- 3) Exceeding the capacity of the valve will result in the reduction of the overall performance of the shower. Since water pressure directly facilitates optimum performance, Newport Brass recommends a minimum of 50 pounds per square inch (psi) for 3 or more outlets.

**NOTE:** In the case of a *well/pump system*, flow and pressure capacity may not accommodate a multi-component shower installation. Please consult a licensed plumber to ensure the supply you're working with is adequate.

- 4) **Removing flow restrictions** from showerheads or body sprays will upset the balance and the capacity of the valve and is a violation of national code.
- 5) When using more outlets than one thermostatic valve can accommodate, we recommend that 2 or more valves be used. If this is the case, Newport Brass suggests that the main water supply be 1" or larger.
- 6) Some plumbers 'tee' from one set of hot and cold supplies to accommodate more than one valve. This practice is *not recommended*. This situation requires that each valve be plumbed directly from the main water supply. It should be noted that the use of a 'tee' could cause fluctuations in temperature and water flow.

## 3/4" GENERAL GUIDELINES FOR PLANNING AND LAYOUT

- 7) **Volume Controls**—Most custom showers are designed with separate on/off volume controls for each outlet device. As with the other outlet devices, the volume controls also have their own flow rates. Newport Brass suggests using 3/4" volume control valves. Where cost is concerned 1/2" volume controls can be used, however, a reduction in the flow rate will result.
- 8) **Body Sprays**—It is recommended that a 1/2" pressure-balancing loop be plumbed for 2 or more body sprays. This technique will allow equal flow rates and temperature to each body spray. Please refer to diagram below.

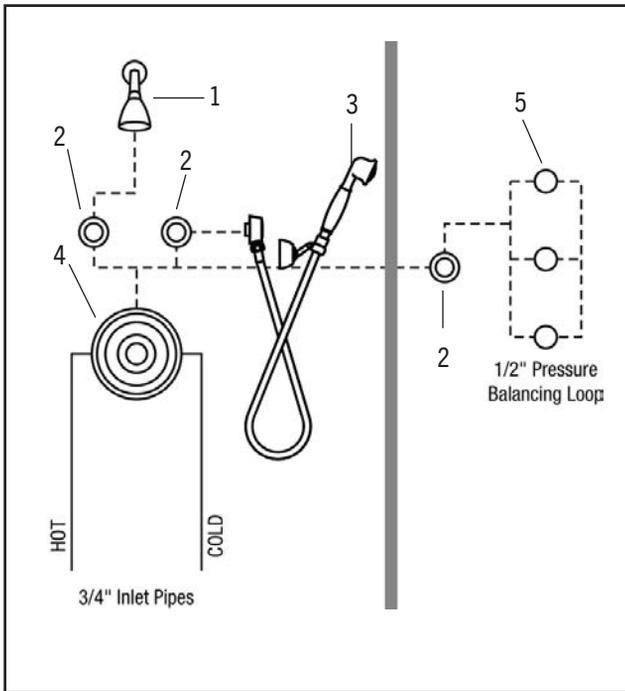

Note: Pressure-Balance Loop should be used on each shower bar installed.

Sales by Brasstech, Inc ("Seller") to purchaser ("Buyer") are governed by these Terms & Conditions, which may not be varied by any unilateral writing of the Buyer without the expressed written consent of the Seller. Our acceptance of your order is conditioned upon the application of these terms and conditions to the order. Any terms and conditions that you may propose in connection with your order that are additional or different from these terms and conditions are deemed material and are hereby rejected.

## 1. PRICES:

Prices are subject to change without notice and are exclusive of any shipping, delivery, packaging or handling charges that might apply.

## 2. TERMS OF DELIVERY:

Seller's products ("Products") are offered Ex-Works Brasstech, Inc., unless otherwise specifically agreed in writing. Risk of loss of Products shall pass to Buyer upon delivery to carrier at place of shipment. Title shall also pass to Buyer upon delivery thereof, subject to our rights under our purchase money security interest pursuant to paragraph 3(c) below. Carrier acts as Buyer's agent. Unless we expressly authorize in our sole discretion otherwise, all Products will be shipped to Buyer's approved showroom location or to a location within Buyer's local trade area.

## 3. TERMS OF PAYMENT:

(a) Seller's terms for all Products sold are 1% 10 Net 30 days from invoice date. Accounts past due are subject to a 1.5% monthly late charge on unpaid balance. (b) Trade discounts from the list prices are expressly conditioned upon timely payment by the Buyer. Trade discounts for accounts past due are subject to rescission by the Seller, at the Seller's sole and absolute discretion. Upon demand by the Seller, the full list price for past due invoices shall become due, subject to the monthly late charge, as described in section 3(a). (c) Until Seller has received full payment for all Products delivered by Seller, Seller shall retain and Buyer hereby grants to Seller a purchase money security interest in such Products to secure payment, so that all such Products which remain within the possession or control of Buyer shall be subject to being demanded back by Seller until the full purchase price is paid pursuant to Seller's purchase money security interest in such Products.

## 4. CLAIMS:

(a) Nonconforming orders: Buyer shall submit to Seller any and all claims for nonconforming delivery of Products by written notice to Seller within fourteen (14) days of receipt of Products. Seller's occasional acceptance of claims made beyond the 14-day period does not constitute a waiver of the 14-day requirement. (b) Damages: Upon delivery of the Products, Buyer should examine the package for damage. Any damage should be noted on the carrier's delivery receipt before signing. In the event of apparent or concealed damage or shortage, Buyer should retain all packaging and file a claim with the carrier. ## 13. LIMITATIONS ON ACTIONS AND LIABILITY:

The statute of limitations applicable to all Buyer's claims arising under this agreement shall be one year from the date the claim accrues.
